#10658
4″ x 54″ Low Stretch Belt

Reduced stretching and high edge retention ensures durability and consistent performance throughout use. Reduced heat generation provides long life.

Specifications

Width	4"
Length	54"
Brand	SHUR-BRITE™
Material Type	Nonwoven
Nonwoven Class	Low Stretch
Nonwoven Category	Surface Conditioning
Abrasive Grain	Aluminum Oxide
Color Family	Brown/Brown
Backing Type	Low Stretch
Waterproof	Yes
Product Form	Belt
Grade	CRS
Standard Package Quantity	6
Stock Status	Non-Stock

Features / Applications

The open structure of surface conditioning belts resists overheating, part discoloration or loading, ensuring consistent quality throughout life - important factors when decorating or finishing large surface areas. In narrow or short form, like file belts, the surface conditioning material is manufactured with additional flex, easily conforming to small contact wheels and narrow areas of the workpiece. Wide belts utilize a low stretch reinforcement, providing stability and reduced changeover on large, robotic equipment.

Features	Tightly-woven reinforcement reduces stretching Consistency in operational performance
