| <b>Grade</b>                     | XCRS                |
| <b>Standard Package Quantity</b> | 10                  |
| <b>Stock Status</b>              | Stock               |

**Features / Applications**

Stripping products are aggressive enough to quickly remove layers of paint, residue, corrosion or rust, but the flexibility will not alter or reshape the solid surface underneath. The open, nonwoven structure resists heat buildup, which could cause excessive loading of some surface layers. Stripping products can be used on all sides and offer consistent performance throughout life.

**Features**

Easily reach narrow areas  
Navigate and finesse small  
diameters and inner contours  
No mandrels or additional  
adapters required
