## Features / Applications

Flexible satin flaps conform to contoured surfaces without altering part geometry or damaging intricate features. Densely arranged flaps provide continuous cutting action throughout life, while resisting heat and loading. Shank and arbor mounted wheels are available depending on size and shape of workpieces or surface area.

Features	Smaller diameters for intricate access Clean and finish inside diameters and through holes Conformable to flat, or inner and outer contours Flaps wear evenly for consistent finishing Clean or deburr threads without damage
