

#37865
2" Type R Mini Flex Disc

Less compressed flaps flex and conform to contours and inside corners and are easily finessed. Sharp zirconia grains reduce heat and friction in demanding applications.

**Specifications**

Diameter	2"
Button Type	Type R
Max RPM	25,000
Opt RPM	13,000
Brand	SHUR-KUT™
Material Type	Coated
Abrasive Grain	Zirconia
Product Form	Flap Disc
Grit	36
Standard Package Quantity	10
Stock Status	Stock

Features / Applications

Overlapping layers of coated abrasives wear down to expose new cutting surfaces, allowing extended use of flap discs and much more control and comfort than rigid grinding wheels. The profile of flap discs, either flat faced (Type 27) or angle faced (Type 29) controls the amount of leverage applied to surfaces. Type 27 flap discs are better for finesse and extended use, whereas Type 29 discs are much more aggressive. Standard density discs provide less flap compression, best suited for stock removal and rough shaping. High density discs utilize more flaps, prolonging life, and are less compressed, allowing limited conformability to the workpiece.

Features

Durable, long-life zirconia grains
Extended flaps reach small areas
Conformable control for critical parts
Quick change functionality for die grinders
