

## #39275 3" Type R Mini Flex Disc

Less compressed flaps flex and conform to contours and inside corners and are easily finessed. Sharp zirconia grains reduce heat and friction in demanding applications.

## **Specifications**

Type R 20,000
20,000
9,000
SHUR-KUT™
Coated
Zirconia
Flap Disc
120
10
Non-Stock

## Features / Applications

Overlapping layers of coated abrasives wear down to expose new cutting surfaces, allowing extended use of flap discs and much more control and comfort than rigid grinding wheels. The profile of flap discs, either flat faced (Type 27) or angle faced (Type 29) controls the amount of leverage applied to surfaces. Type 27 flap discs are better for finesse and extended use, whereas Type 29 discs are much more aggressive. Standard density discs provide less flap compression, best suited for stock removal and rough shaping. High density discs utilize more flaps, prolonging life, and are less compressed, allowing limited conformability to the workpiece.

	Durable, long-life zirconia grains
	Extended flaps reach small
	areas
Features	Conformable control for critical
	parts
	Quick change functionality for
	die grinders
