Change Disc

Features / Applications

The smaller diameters of quick change discs allow easy access to tighter areas of intricate workpieces, while maintaining a higher speed for aggressive material removal or blending. Used on right angle die grinders, quick change discs can be finessed and easily controlled for precision material removal, shaping or blending applications. Worn discs can be replaced without additional tooling, minimizing production downtime, and easing progressive finishing steps.

	Aggressive blending & removal Firm cutting action for flat
	surfaces
Features	Heavy deburring
	Scale removal
	Rough shaping of soft materials
	Fastest initial stock removal
