

**#41334**
4" Type R Quick Change Disc

Ideal for spot removal, cleaning seam lines, or contoured stripping in small areas or intricate parts. Easily transition to other quick change applications.

Specifications

Diameter	4"
Button Type	Type R
Max RPM	9,800
Opt RPM	7,800
Brand	SHUR-BRITE™
Material Type	Nonwoven
Nonwoven Class	Black
Nonwoven Category	Stripping
Color Family	Black
Product Form	Quick Change Disc
Grade	XCRS
Standard Package Quantity	10
Stock Status	Non-Stock

Features / Applications

Stripping products are aggressive enough to quickly remove layers of paint, residue, corrosion or rust, but the flexibility will not alter or reshape the solid surface underneath. The open, nonwoven structure resists heat buildup, which could cause excessive loading of some surface layers. Stripping products can be used on all sides and offer consistent performance throughout life.

Features

Gasket and residue removal before reassembly
Easily access small areas
Consistent cutting action throughout life
