Features / Applications

The layered, non-directional construction of SHUR-BRITE™ Unitized Wheels and Discs ensures continual exposure of abrasive grains during surface preparation, cleaning, blending and polishing operations. A variety of sizes and grades are available for use with intricate components to larger workpieces. Due to the conforming nature of unitized materials, surface requirements can be achieved without affecting workpiece tolerances, and with minimal heat buildup.

Features

Reinforced leverage with cushioned control
Finish larger areas without operator or tooling fatigue
Contour large inner or outer diameters
