

#46583 4-1/2" x 7/8" Type 27 Flap Disc

Designed to utilize the added leverage and increased contact pressure of right angle grinders. Manufactured with a fiberglass plate, no backing pad is necessary, and a threaded hub option provides fast changeover without additional tooling. Surface conditioning flaps overlap radially, increasing airflow and reducing loading or burning during operation.

Specifications

Diameter	4-1/2"
Arbor Diameter	7/8"
Type	Type 27
Shape	Flat
Max RPM	13,300
Opt RPM	5,800
Brand	SHUR-BRITE™
Material Type	Nonwoven
Nonwoven Class	Grind Duty
Nonwoven Category	Surface Conditioning
Abrasive Grain	Aluminum Oxide
Product Form	Flap Disc
Grade	MED
Standard Package Quantity	5
Stock Status	Stock

Features / Applications

Designed to utilize the added leverage and increased contact pressure of right angle grinders. Manufactured with a fiberglass plate, no backing pad is necessary, and a threaded hub option provides fast changeover without additional tooling. Surface conditioning flaps overlap radially, increasing airflow and reducing loading or burning during operation.

Features

Use on angle grinder without backing pad
Designed for focused contact pressure
Firm cutting action for flat surfaces
Blend coated abrasive scratch patterns
Weld and seam blending or cleaning
