

**#54899**
2" Type R Quick Change Disc

Small diameter discs used flat or on edge, reaching small areas or intricate shapes. Quick change function reduces changeover time and can easily switch between other quick change products for multi-step processing.

Specifications

Diameter	2"
Button Type	Type R
Max RPM	10,500
Opt RPM	8,000
Brand	SHUR-BRITE™
Material Type	Nonwoven
Nonwoven Class	Red
Nonwoven Category	Stripping
Grain Enhancement	Red
Product Form	Quick Change Disc
Grade	XCRS
Standard Package Quantity	50
Stock Status	Stock

Features / Applications

Stripping products are aggressive enough to quickly remove layers of paint, residue, corrosion or rust, but the flexibility will not alter or reshape the solid surface underneath. The open, nonwoven structure resists heat buildup, which could cause excessive loading of some surface layers. Stripping products can be used on all sides and offer consistent performance throughout life.

Features

Easy control in small areas and on contours
Consistent, long-life cutting action
Aggressive cutting action for tough coatings
Switch between quick change products
