

**#58850**
4-1/2" x 7/8" Type 29 BLAC-KUT™
Flap Disc

A cost efficient option to high density discs, Blac-Kut Flap Discs are manufactured with larger flaps, providing effective material removal with an extended product life. Available in Type 29, for beveling and removal, or Type 27 for flat grinding and blending.

Specifications

Diameter	4-1/2"
Arbor Diameter	7/8"
Type	Type 29
Shape	Angle
Density	High
Max RPM	13,300
Brand	SHUR-KUT™ BLAC-KUT™
Sub-Brand	BLAC-KUT™
Material Type	Coated
Abrasive Grain	Zirconia
Color Family	Blue
Backing Type	Cloth
Backing Material	Cotton
Backing Weight	X-Wt.
Bond Type	Resin/Resin
Product Form	Flap Disc
Grit	80
Standard Package Quantity	10
Stock Status	Stock

Features / Applications

Overlapping layers of coated abrasives wear down to expose new cutting surfaces, allowing extended use of flap discs and much more control and comfort than rigid grinding wheels. The profile of flap discs, either flat faced (Type 27) or angle faced (Type 29) controls the amount of leverage applied to surfaces. Type 27 flap discs are better for finesse and extended use, whereas Type 29 discs are much more aggressive. Standard density discs provide less flap compression, best suited for stock removal and rough shaping. High density discs utilize more flaps, prolonging life, and are less compressed, allowing limited conformability to the workpiece.

Features

Larger flaps for greater surface contact
Extra-long product life
Aggressive stock removal on hard metals
Sharp cut reduces heat, friction and loading
High pressure applications
