

**#59815**  
**4-1/2" x 7/8" Type 27 BLAC-KUT™**  
**Flap Disc**

A cost efficient option to high density discs, Blac-Kut Flap Discs are manufactured with larger flaps, providing effective material removal with an extended product life. Available in Type 29, for beveling and removal, or Type 27 for flat grinding and blending.

**Specifications**

<b>Diameter</b>	4-1/2"
<b>Arbor Diameter</b>	7/8"
<b>Type</b>	Type 27
<b>Shape</b>	Flat
<b>Density</b>	High
<b>Max RPM</b>	13,300
<b>Brand</b>	SHUR-KUT™ BLAC-KUT™
<b>Sub-Brand</b>	BLAC-KUT™
<b>Material Type</b>	Coated
<b>Abrasive Grain</b>	Zirconia
<b>Color Family</b>	Blue
<b>Backing Type</b>	Cloth
<b>Backing Material</b>	Cotton
<b>Backing Weight</b>	X-Wt.
<b>Bond Type</b>	Resin/Resin
<b>Product Form</b>	Flap Disc
<b>Grit</b>	80
<b>Standard Package Quantity</b>	10
<b>Stock Status</b>	Stock

**Features / Applications**

Overlapping layers of coated abrasives wear down to expose new cutting surfaces, allowing extended use of flap discs and much more control and comfort than rigid grinding wheels. The profile of flap discs, either flat faced (Type 27) or angle faced (Type 29) controls the amount of leverage applied to surfaces. Type 27 flap discs are better for finesse and extended use, whereas Type 29 discs are much more aggressive. Standard density discs provide less flap compression, best suited for stock removal and rough shaping. High density discs utilize more flaps, prolonging life, and are less compressed, allowing limited conformability to the workpiece.

**Features**

Larger flaps for greater surface contact  
Extra-long product life  
Aggressive stock removal on hard metals  
Sharp cut reduces heat, friction and loading  
High pressure applications
