SHUR-KUT® Coated

Sheets

General purpose product form can be cut to size, folded, or used in full sheets for a variety of maintenance or machine shop applications. Durable cloth materials flex and conform to contours and cylindrical parts and withstand aggressive applications. Paper backings adapt to corners and acute geometries and can be wrapped around dowels for finishing small tubes or holes.

Applications

- Cleaning, prep or finishing flat and contoured parts
- Polishing large or intricate parts
- Lathe parts finishing and polishing
- Blending or spot sanding
- Crankshaft and bearing polishing

ALUMINUM OXIDE RESIN CLOTH SHEETS

Durable, flexible cloth backing and dense grains conform to cylindrical or contoured parts. Cut or tear to usable size to accommodate various tasks and reduce waste.

- Flexible with excellent grain retention
- Conform to small radii and fine contours
- Durable backing for aggressive applications
- Precision lathe and drum grinding

Resin Cloth Stik-On Strips

Pre-cut cloth strips with PSA backing allows temporary adhesion to stationary or handheld sanding blocks for delicate shaping, cleaning or finishing. Narrow width to access channels or hard to reach areas.

- Strong, removable adhesive
- Narrow strips for limited access
- Durable backing for aggressive applications

**EMERY CLOTH SHEETS**

Flexible cloth backing with self-sharpening, fine grained abrasives. Used for final sizing and fitting of critical components where excess material removal is not necessary.

- Sharp fractures produce fine cuts
- Minimal surface removal for critical or sensitive applications
- Delicate rust removal

**SILICON CARBIDE**

Waterproof Paper Sheets

Silicon carbide grains provide a sharp, fine cut. Thin, paper backing conforms to undulations and variable contours. Use with water or lubricants for much finer finishing and polishing.

- Sharper grains produce brighter and finer scratch patterns
- Cut and polish non-ferrous metals
- Use wet for finer polishing
